Hotwire
COMMUNICATIONS

RANKED #1 BY

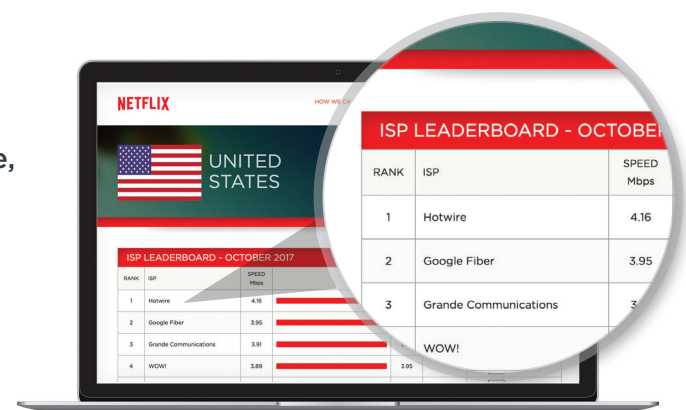

NETFLIX

Today, Netflix expanded their monthly ISP Speed Index ranking to include several new Internet Service Providers, and among them was Hotwire Communications. For the month of October 2017, our inaugural ranking, Hotwire Communications was ranked #1 among all ISP's in the United States.

Our ranking of 4.16 Mbps topped some of the nation's largest ISP's by great margins, including Xfinity from Comcast, AT&T's U-Verse, Google Fiber, and Verizon FiOS. The Netflix ISP Speed Index is considered one of the most prestigious and authoritative measures of the quality and consistency of any ISP.
